

TONE—above all, TONE

Because the tone of an instrument depends almost as much upon the original recording process in the record making as on the reproducing mechanism of the instrument itself, Columbia Double Disc Records, played on any instrument, are indeed a tone-revelation to most people.

Once you have played a Columbia Record on your instrument, we believe you will never again be satisfied with a tone less round and rich and natural. A talking-machine record is the only article of merchandise in the world that literally "speaks for itself." Hear one Columbia Record and we have told our story.

Brochure on Pie Biting.

The tendency among highbrows to minimize pie eaters is rampant. Of course they don't know that Ralph Waldo Emerson's fondness for pie brought out much of his philosophy. He devoured pie up to the age of seventy-nine years. Because he didn't like pie Thomas Carlyle lived and died with a grudge. Nietzsche was a pie biter for many years and grew quite a smile until in an unguarded moment he switched to German apple cake. He never smiled again.—Richmond Times Dispatch

Some Sugar Beets—

A. G. Hood has brought to the Commercial club from his ranch down the river samples from the experimental plot of sugar beets which he grew that are evidence that the Rogue beet will be a world-beater. They are smooth and would class as beauties when judged from the beet point of view. Mr. Hood says that the patch was irrigated a couple of times, but that it received no cultivation. It was grown on sandy river bottom soil.

MACDUFF RETURNS FROM TRIP DOWN THE ROGUE RIVER

Mr. and Mrs. N. E. Macduff returned Friday evening from a trip to the coast, going down the trail along Rogue river to Gold Beach.

They report a magnificent outing, in which the supervisor also combined business with pleasure, and inspected much of the Slakiyou forest. They went to Galice from Grants Pass, then to Bear camp, and back to the river at Agness and down to Gold Beach at the mouth of the river.

Then up the coast to Port Orford, over the hills again to Agness, and up the Rogue trail to Galice. They traveled by saddle horse or afoot, and made comfortable places for lodgings each night. Mr. Macduff reports that the Rogue trail around the Devil's Stairs is now practically completed and that it makes a wonderful improvement in down river travel. The new trail is on a grade, about a hundred feet above the river, and has a four-foot tread. For scenic beauty and interest to the outer, Mr. Macduff says that the route taken offers much.
